

# 2024 CORVETTE E-RAY

## ALL-NEW FOR 2024!

- Elevating the mid-engine platform with e-AWD assist takes the E-Ray – available in coupe and convertible models – to a whole new level. Not only does this bring a huge leap in four-season capability, the intelligent controls dynamically adjust in real time to provide front axle assist for ultimate stability and balance, providing nimble control
- E-Ray is also the only sports car pairing two separate propulsion systems to provide naturally aspirated V-8 power with electrified responsiveness powered by eAWD, making it one like none
- The E-Ray is the quickest production Corvette in history, clocking a 2.5-second 0-60 mph time<sup>1</sup> before breezing through the quarter-mile in 10.5 seconds<sup>1</sup>
- A 6.2L V-8 is complemented by an electric motor that channels an additional 160 horsepower and 125 lb-ft of torque through the front wheels, for 655 combined horsepower<sup>2</sup>

HEATED AND VENTILATED SEATS AND A HEATED STEERING WHEEL ARE STANDARD ON 2LZ AND 3LZ
