

2026 CORVETTE WHAT'S NEW

EXCELLENCE MEETS INNOVATION: Introducing the 2026 Corvette lineup, with reimagined interiors that blend refined craftsmanship and cutting-edge technology to deliver an unrivaled driving experience. From the versatile Stingray and all-season E-Ray to the track-ready Z06 and ultra-powerful ZR1, there's a Corvette tailored to every driver.

DESIGN

A thoroughly reimagined **driver-centric cockpit** introduces a **new 3-screen layout** with a larger **12.7" center console display**, expanded **14" driver information center**, and **all-new 6.6" auxiliary touchscreen** to the left of the steering wheel, for an intuitive and immersive experience.

Key Enhancements:

- ✓ **New 3-screen display layout** with expanded and enhanced digital interfaces.
- ✓ **Reconfigured center console** with relocated Drive Mode Selector and HVAC controls.
- ✓ **New Standard Wireless Charging Pad¹** added to center console.
- ✓ **Redesigned open cupholders** with ambient lighting and Corvette crossed flags.
- ✓ **New passenger grab handle** with additional integrated USB-C charging port².

TECHNOLOGY – Aux Display & Drive Modes

Corvette offers cutting-edge technology that is both functional and intuitive, seamlessly integrating updated hardware and software for an enhanced driving experience. The three new configurable **driver-centric displays** are larger, featuring sharper colors, improved agility, and expanded functionality.

Key Enhancements:

- ✓ **All-new 6.6-inch auxiliary display:** Provides dedicated, driver-configurable space for instrumentation such as trip mileage or Performance Traction Management, making important information easier to access.

- ✓ **Redesigned Drive Mode Selector:** The hard switch has been relocated in line with the gear selector. Tour, Sport and Track display designs have been modernized with new animations and cleaner graphics.

TECHNOLOGY – PDR, PTM & Performance App

Corvette offers cutting-edge technology that is both functional and intuitive, seamlessly integrating updated hardware and software for an enhanced driving experience. The three new configurable **driver-centric displays** are larger, featuring sharper colors, improved agility, and expanded functionality.

Key Enhancements:

✅ Enhanced Performance Data Recorder:

Complete user interface overhaul with features like side-by-side video analysis and automated “speed tips” coaching, delivering real-time performance insights right from the vehicle screen.

✅ Performance App Now on All Models:

Formerly on E-Ray only. Power and torque flow gauges are maintained, and additional capability has been added or consolidated into the app.

✅ Performance Traction Management (PTM) Enhancements:

A new dedicated switch below the aux screen offers one-touch access to PTM, including the new PTM Pro Mode. Real-time 3D graphics depict Corvette in dynamic drift states.

ADDITIONAL HIGHLIGHTS

- ✓ Two new exterior colors: Roswell Green Metallic & Blade Silver Metallic.
- ✓ ZR1's available ZTK package adds new brake system featuring 10-piston front and 6-piston rear calipers.
- ✓ New available electrochromic coupe roof panel allows adjustable tint levels.
- ✓ Charge+ button on E-Ray relocated to steering wheel for improved usability.
- ✓ Body color rocker panels now standard on E-Ray and available on Z06.
- ✓ New available asymmetrical exterior stripe in Edge Red/Carbon Flash.
- ✓ Blue brake calipers, currently available on ZR1, now available on E-Ray and Z06.
- ✓ Carbon Fiber Display hood now standard on ZR1, available on E-Ray/Z06
